## NOTES TO THE CONSOLIDATED CONDENSED INTERIM FINANCIAL STATEMENTS

OCTOBER 31, 2015

(Unaudited – Prepared by Management)

(Expressed in Canadian dollars)

**1. NATURE AND CONTINUANCE OF OPERATIONS AND GOING CONCERN ASSUMPTION**

Strongbow Exploration Inc. (the “Company”) is incorporated federally under the laws of the Canada Business Corporations Act (“CBCA”).

The consolidated condensed interim financial statements of the Company are presented in Canadian dollars, which is the functional currency of the Company. The Company trades on the TSX Venture Exchange (“TSX-V”), (TSX-V – SBW) and its head office is located at Suite 960 – 789 West Pender Street, Vancouver, BC, Canada V6C 1H2. The Company has one subsidiary, Strongbow Alaska, Inc. which is incorporated under the laws of Alaska, USA.

The Company’s principal business activity is the acquisition and exploration of exploration and evaluation assets. To date, the Company has not generated significant revenues from operations and is considered to be in the exploration stage.

The Company is in the process of acquiring and exploring its exploration and evaluation assets and has not yet determined whether these properties contain reserves that are economically recoverable. The recoverability of the amounts shown for exploration and evaluation assets and related deferred costs is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the financing necessary to complete the development of its exploration and evaluation assets and upon future profitable production.

These consolidated condensed interim financial statements have been prepared on a going concern basis with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. However, the Company has sustained substantial losses from operations since inception and has no current source of revenue. Continued operations of the Company and further exploration on the remaining exploration and evaluation assets is dependent on the Company’s ability to complete additional equity financings or generate profitable operations in the future. These material uncertainties may cast significant doubt about the Company’s ability to continue as a going concern. These financial statements do not reflect the adjustments to the carrying values of assets and liabilities, the reported amounts of expenses and the classification of statement of financial position items if the going concern assumption was inappropriate. These adjustments could be material.

As at October 31, 2015, the Company had current assets of \$924,534 to settle current liabilities of \$106,406. Although the Company has positive working capital of \$818,128 as at October 31, 2015, the Company may be required to delay discretionary expenditures if additional financing cannot be obtained on reasonable terms. Failure to obtain additional financing may result in the loss of some or all of the Company’s exploration and evaluation assets (Note 8).

**2. BASIS OF PRESENTATION****Statement of Compliance**

These consolidated condensed interim financial statements have been prepared in accordance with International Accounting Standards 34, Interim Financial Reporting (“IAS 34”) using the same accounting policies and methods of application as the audited consolidated financial statements of the Company for the year ended January 31, 2015. These consolidated condensed interim financial statements do not include all disclosures required by International Financial Reporting Standards (“IFRS”) for annual audited consolidated financial statements and accordingly should be read in conjunction with the Company’s annual audited consolidated financial statements for the year ending January 31, 2015 prepared in accordance with IFRS as issued by the International Accounting Standards Board (“IASB”).

The policies applied in these consolidated condensed interim financial statements are based on IFRS issued and outstanding as of December 8, 2015, the date the Board of Directors approved the statements.

**2. BASIS OF PRESENTATION – *Continued***

**Adoption of New IFRS Pronouncements**

The adoption of IFRS 7 - *Financial Instruments* did not have an effect on the Company's financial statements. Disclosures (amendments) are effective for annual periods beginning on or after January 1, 2015.

**New Standards Not Yet Adopted**

- IFRS 9, Financial Instruments (tentative adoption date January 1, 2018) introduces new requirements for the classification and measurement of financial assets and liabilities.
- IFRS 14, Regulatory Deferral Accounts is effective for annual periods beginning on or after January 1, 2016.
- IFRS 15, Revenue from Contracts with Customers is effective for annual periods beginning on or after January 1, 2017.

The Company is currently assessing the impact of these new and amended accounting standards on its consolidated financial statements. The impact is not expected to have a material impact on the statements of financial position or results of operations.

**3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**

The Company's financial instruments consist of cash, marketable securities, receivables, and accounts payable and accrued liabilities. Cash is carried at fair value using a level 1 fair value measurement. The carrying value of receivables and accounts payable and accrued liabilities approximate their fair values due to their immediate or short-term maturity. Marketable securities are recorded at fair value based on the quoted market prices in active markets at the statement of financial position date, which is consistent with level 1 of the fair value hierarchy.

The Company is exposed to a variety of financial risks by virtue of its activities, including credit risk, interest rate risk, liquidity risk, foreign currency risk, and equity market risk. The Company's objective with respect to risk management is to minimize potential adverse effects on the Company's financial performance. The Board of Directors provides direction and guidance to management with respect to risk management. Management is responsible for establishing controls and procedures to ensure that financial risks are mitigated to acceptable levels.

*Credit risk*

Credit risk is the risk of financial loss to the Company if a counter-party to a financial instrument fails to meet its contractual obligations. The Company's receivables consist primarily of sales tax receivables due from the federal government and receivables from companies with which the Company has exploration agreements or options. The maximum exposure to credit risk at the reporting date is the carrying value of the Company's receivables and cash.

*Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Financial assets and liabilities with variable interest rates expose the Company to interest rate risk with respect to its cash flow. The risk that the Company will realize a loss as a result of a decline in the fair value of any short-term investment included in cash is limited because these investments, although readily convertible into cash, are generally held to maturity.

**3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT - *Continued****Liquidity risk*

Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company's ability to continue as a going concern is dependent on management's ability to raise the funds required through future equity financings, asset sales, exploration option agreements, or a combination thereof. The Company has no regular cash flow from its operating activities. The Company manages its liquidity risk by forecasting cash flow requirements for its planned exploration and corporate activities, and anticipating investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of annual budgets and significant expenditures and commitments. Failure to realize additional funding, as required, could result in the delay or indefinite postponement of further exploration and development of the Company's properties, and could result in the Company being unable to meet the continued listing requirements of the TSX-V. On July 24, 2015, the Company completed a non-brokered private placement financing of ten million units for gross proceeds of \$1,000,000 (Note 9). As at October 31, 2015, the Company had current assets of \$924,534 to settle current liabilities of \$106,406.

*Foreign Currency Risk*

The Company has exposure to foreign currency risk through its exploration and evaluation assets in the United States however, the majority of its current assets and current liabilities are denominated in Canadian dollars. In July 2015, the Company completed an acquisition of two mineral properties in Alaska, U.S.A. To the extent that the Company has U.S. dollar denominated assets, liabilities or expenses, the Company will be affected by changes in exchange rates between the Canadian dollar and the U.S. dollar. The Company does not presently invest in foreign currency contracts to mitigate this risk. It is management's opinion that the Company is not exposed to significant foreign currency risk as at and for the nine months ended October 31, 2015.

*Equity market risk*

The Company is exposed to equity price risk arising from its marketable securities, which are classified as available for sale. The Company plans to sell its marketable securities as market conditions permit, or as is required to finance the Company's operations from time-to-time.

**4. MARKETABLE SECURITIES**

The Company holds 2,295,000 common shares in three TSX-V listed companies (January 31, 2015 – 295,000 common shares).

During the nine months ended October 31, 2015 the Company received 2,000,000 common shares of Westhaven Ventures Inc. ("Westhaven"), with an estimated fair value of \$120,000 (\$0.06 per share). The Westhaven common shares were received as consideration for the sale of the Shovelnose property (Note 8). Westhaven and the Company are related by virtue of a common director.

Title to exploration and evaluation assets involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many exploration and evaluation assets. The Company has investigated title to all of its exploration and evaluation assets and, to the best of its knowledge, title to all of its properties is in good standing.

**Sleitat and Coal Creek Tin Properties, Alaska, U.S.A.**

On July 24, 2015, Strongbow acquired the Sleitat and Coal Creek tin properties in Alaska (collectively, the "Properties") subject to the terms of a property purchase agreement (the "Agreement") with Osisko Gold Royalties Ltd. ("Osisko") and Mr. R. Netolitzky, and their respective wholly-owned companies, Brett Alaska Resources Inc. ("Brett") and Thor Gold Alaska, Inc. ("Thor"). Thor held a 20% undivided interest in the Sleitat property and Brett held an 80% undivided interest in the Sleitat property and a 100% interest in the Coal Creek property. Mr. Netolitzky is a director of Strongbow and is therefore non-arm's length to Strongbow. Strongbow acquired the Properties for total consideration of 6,500,000 common shares of Strongbow allocated as to 5,000,000 common shares to Brett and 1,500,000 common shares to Thor, and a 2% NSR royalty on the Properties. The NSR royalty is allocated 1.75% to Brett and 0.25% to Thor. The common shares were issued at \$0.10 per share for a value of \$650,000. In addition, property acquisition costs of \$73,861 were incurred.

In addition to the shares and the NSR royalty, Strongbow has granted Osisko a first right of refusal on the sale of any future royalties on any of its properties. Closing of the acquisition of the Properties and the private placement financing (Note 9) has resulted in Osisko and Brett holding together 7,000,000 shares of Strongbow or 27.3% of the post-closing issued shares of the Company. As a result, Osisko is now considered a 'control person' as defined by the TSX Venture Exchange policies.

**8. EXPLORATION AND EVALUATION ASSETS - *Continued***

**Gold and Base Metal Properties, British Columbia**

The Company maintains interests in various gold and base metal properties in B.C.

*Shovelnose Property*

The Company acquired, by staking, a 100% interest in certain mineral claims comprising the Shovelnose property in October 2005. The Company expanded the Shovelnose property by staking additional mineral claims in November 2008.

In January 2011, the Company signed an option agreement with Westhaven whereby Westhaven could earn up to a 70% interest in the Shovelnose property. A director of the Company is also a director of Westhaven. This agreement was subsequently amended in June 2014 and July 2015.

On September 9, 2015, the Company and Westhaven entered into a property purchase agreement. The Company sold its interest in the Shovelnose property in exchange for 2,000,000 common shares of Westhaven (received) and a 2% Net Smelter Returns Royalty (“NSR”) which can be reduced to 1%, at Westhaven’s option, for \$500,000.

As at October 31, 2015, the Company wrote-off capitalized exploration and evaluation assets of \$605,051 related to the Shovelnose property. This write-off was reduced by \$120,000, being the estimated fair value of the Westhaven common shares received, to \$485,051 for the nine months ended October 31, 2015.

**Other Exploration Properties and Generative Exploration, Canada**

*Other Properties*

The Company maintains a number of mineral claims in British Columbia, Saskatchewan, and the Northwest Territories as part of the Company’s generative exploration programs.

**9. CAPITAL AND RESERVES**

**Authorized Share Capital**

At October 31, 2015, the authorized share capital is an unlimited number of common shares without par value. All issued shares are fully paid.

**Share issuances**

In July 2015, the Company completed a non-brokered private placement of 10,000,000 units at a price of \$0.10 per unit for gross proceeds of \$1,000,000. Each unit consisted of one common share and one half of one common share purchase warrant. Each full warrant entitles the holder to purchase one share of the Company at a price of \$0.20 until July 24, 2017. The common shares issued as part of this private placement and any common shares issued upon exercise of the warrants are subject to a four month hold period which expired November 25, 2015. As part of the private placement, the Company paid cash finders' fees totalling \$19,500. Insiders of the Company participated in this private placement, including a \$200,000 subscription by Osisko.

**9. CAPITAL AND RESERVES - Continued****Stock options and warrants**

In July 2015, the Company's shareholders approved the Company's Stock Option Plan (the "Plan"), which establishes a rolling number of shares issuable under the plan in the amount of 10% of the Company's issued shares at the date of grant.

Under the terms of the Plan, the exercise price of each stock option granted cannot be less than the market price at the date of grant, less a discount up to 25% in accordance with the policies of the TSX-V. Options granted can have a term up to five years with vesting provisions determined by the directors in accordance with TSX-V policies for Tier 2 Issuers.

As at October 31, 2015 the following stock options and warrants were outstanding:

	Number of Shares	Exercise Price	Number Exercisable	Expiry Date
<b>Options</b>	7,000	\$ 4.20	7,000	December 22, 2015
